

## Alexandri Foteini

I am a speech and language therapist. My work is mainly focused on dementia and other neurodegenerative diseases, both clinically and academically. I am currently working in a rehabilitation center, in which I am responsible for the assessment and intervention of people with speech disorders or/and swallowing difficulties. As well as I am participating as Independent Rater in the clinical trial EVOKE/EVOKE+ of Novo Nordisk, via Greek Association of Alzheimer's Disease and Related Disorders. I have graduated from the Speech and Language Therapy Department of the Technological Educational Institute of Epirus. I recently completed the M.Sc. Dementia Studies programme of University of Stirling (Scotland), while I will soon complete the M.Sc. Neurosciences and Neurodegenerative Diseases programme of the Aristotle University of Thessaloniki. I have attended seminars and conferences related to neurosciences, neurodegenerative diseases and special education. I have also participated as a speaker at the 12th Panhellenic Alzheimer's Congress and the 4th Mediterranean Congress of Neurodegenerative Diseases for the project " Treatment of Behavioral Disorders in Dementia Patients, with and without Cannabidiol 3%".
