

Gkioka Mara

Mara Gkioka (Msc, Phd), completed a bachelor degree, and a postgraduate program in Cognitive Psychology and Neuropsychology in the department of Psychology (AUTH) while she posses a PhD in school of Medicine at the same University. She has an 10 year clinical experience in neuropsychological assessment and she has worked in 6 European research networks/programs (three clinical trials), mainly focused on dementia, as coordinator and assessor in neuropsychological batteries. She has participated in several conferences around Europe, she is author of 18 papers and also reviewer in several journals and member of editorial board of an international peer-reviewed scientific journal (JAD). She is a fellow of Greek Association of Alzheimer Disease and Related Diseases (GAARDR). She was a research fellow in the 1st neurology department of AHEPA Hospital-Thessaloniki working with prof. Tsolaki. Her PhD thesis, funded by Robert Bosch Stiftung, is titled "Educational Aspects in Medicine and in Nursing Care -Training for the Promotion of Sensitization and Enhanced Competency". She developed and conducted a training program for nurse staff, tailored to the communication and behavioral challenges of people with dementia, in order to improve well-being during hospitalization.
