

Glišović Krivec Špela

Dr. Špela Glišović Krivec: actively volunteering at Spominčica-Alzheimer Slovenia activities since 2015 and being a senior consultant at Spominčica since 2020. She has worked several years in pre-clinical research in the field of neurodegenerative diseases, brain and muscle regeneration and molecular biology. As a sales engineer she was responsible for new biomedical product launches on the market and providing customer support in the field of sequencing, genetic analysis and microscopy. She coordinated and held the symposia New Diagnostic Trends in Detection of Oncological and Rare Diseases. Afterwards, she was a member of the Competent Authority, a Senior Regulatory and Audit Advisor at the Slovenian Agency for Medicinal Products and Medical Devices. She was in charge of conducting the process of assessing notifications of clinical trials and evaluation studies, professional consultancy, and classification of medical devices in accordance with the Helsinki procedure. Currently, she is leading the TeNDER Horizon2020 project at Spominčica and coordinating the different stakeholders` involvement across Europe. She is a member of ISO/TC314 working groups and a review for WHO GDO. She speaks fluent English and Italian.
