

## KASOTAS ATHANASIOS

I am a graduate of the Medical School of the University of Thessaly (July 2016 with a grade of 8.57 "Excellent"). I have an excellent knowledge of English and German as well as computer skills. I completed the first part of my residency in pathology, lasting 2 years, from October 2016 to October 2018, at the General Hospital of Volos, with the aim of obtaining the specialty title in endocrinology (I am on the waiting list of endocrinology of the University General Hospital of Larissa). In June 2021, I successfully completed the postgraduate program <<Thrombosis and Antithrombotic Treatment>> of the Department of Medicine of the University of Thessaly, with a grade of 9.46 'Excellent', in which I excelled, for which I was offered in December 2021, the preparation of a doctoral thesis with a scholarship from the Faculty of Medicine of the University of Thessaly. I am already in contact with the supervising professor to find a topic and start it. From October 2021 until today, I am attending the postgraduate program <<Newer methods and technologies in the therapeutic management of diabetes mellitus. I have participated in oral presentations at national conferences. I have accumulated 493 continuing education credits (CME-CPD Credits) by attending a multitude of conferences, seminars and post-graduate courses. Since May 2022 I am working as a physician in the private polyclinic Agios Georgios in Volos, being responsible for the management of pathological and neurological patients.
