

## **Kavelidis Frantzis Dimitrios**

Dimitrios Kavelidis Frantzis was born in Kastoria, Greece in late '90s where he spent his childhood years. From a young age he had a great love for music, acoustics and sound, but in the end, he turned to mathematics, which he then decided to pursue. He received his degree from the Department of Electrical and Computer Engineering of the Aristotle University of Thessaloniki in the fall of 2022 and has been engaged in research ever since. His research interests include digital signal processing, machine learning, data analysis and robotics, among others. However, his ambition is his research to contribute to society by offering solutions of a biotechnological nature with the aim and intention of improving the quality of life and health of people. Thus, beyond his specialty, he is very interested in learning about the currently existing biomedical problems and challenges, in order to contribute to the development of innovative human-centered technologies.
