

Moreno Alexander

Dr. Alexander Moreno is a licensed Clinical Neuropsychologist/Psychologist member of the College of Psychologists of Quebec (Ordre des Psychologues du Québec, OPQ) in Canada and the College of Psychologists of Colombia (Colegio Colombiano de Psicólogos, COLPSIC). He holds a master's degree in health psychology from the National University of Colombia, a doctoral degree in cognitive sciences and neuropsychology from the University of Montreal and completed his postdoctoral fellowship at McGill University. Currently, Dr. Moreno is an Adjunct Professor in the Department of Psychology at Université de Montréal and works as a Clinical Neuropsychologist/Psychologist at Notre-Dame Hospital in Montreal (CIUSSS du Centre-Sud-de-l'Île-de-Montréal). For several years, he has been working in the areas of rehabilitation and neurodisability. He has authored numerous peer-reviewed scientific and review articles in the areas of health psychology, neuropsychology, neurorehabilitation, and gerontechnology. He supervises clinical and research students at the bachelors, masters and doctoral levels. As a researcher, a clinician, and a mentor, he advocates for the inclusion of clients' intervention priorities in individuals with brain injuries and their families. He is also the Director of the Innovation, Technology, and Cognition (INTECOG) Laboratory at the Montreal Geriatrics University Institute (CRIUGM).
