

Konstantinos Tasioulis

Konstantinos Tasioulis is a postgraduate student at the Laboratory of Biochemistry of the Department of Chemistry of the Aristotle University of Thessaloniki. His research interests focus on the understanding and elucidation of molecular mechanisms of signal transduction in pathological conditions, such as cancer and neurodegenerative diseases. He completed his undergraduate studies at the Department of Food Science and Technology in the School of Agriculture of the Aristotle University of Thessaloniki, receiving the Integrated Master's Degree with a grade of 8.89/10 (Excellent). The topic of his thesis "Study of protein hydrolysis during cheese ripening" was graded with Excellent by a three-member committee. Konstantinos Tasioulis was for 2 years a scholarship holder of the ELKE AUTH, teaching undergraduate courses and conducting tutorials and laboratory exercises in the Laboratories of Chemistry and Food Technology and Biochemistry of the Department of Chemistry of the Aristotle University of Thessaloniki. In the two months of August-September 2021, he participated in the summer school "Molecular Medicine", in Jena, Germany, attending courses and seminars in the fields of Molecular Biology, Cell Signaling and Communication, Biophotonics and Diseases. He has 3 publications in national conference proceedings, 11 Continuing Medical Education (CME-CPD) and 25 Cat. 1 ESMO MORA Points.
