

## **Evanthia Tsotsou**

Graduate of the Department of Psychology of the University of Ioannina (September 2016-December 2021). During my undergraduate studies, I did an internship at the Psychiatric Hospital of Attica (DAFNI) and at the Cognitive Rehabilitation Unit of Psychiatric Hospital of Attica (September 2020-December 2020). During my internship I was trained in psychoeducation sessions and counseling for hospitalized patients and their families. In addition, I attended the cognitive rehabilitation program held at the Unit and was trained in the process of cognitive enhancement and training of patients with schizophrenia and dementia as well as the materials used for both assessment and rehabilitation. In addition, during the period of June 2021- August 2021 I carried out an internship at the Psychiatric Clinic of General Hospital of Arta where I was trained in the diagnostic interview and history taking and the administration and interpretation of psychometric tests (such as MMPI personality questionnaire, WAIS IV intelligence test and other psychological and neuropsychological tests, such as BDI, BAI, GDS, GAF, ECAS, ACE-III, MoCA, MMSE). I also participated and organized creative activities for inpatient and outpatient groups, while I trained in counseling and providing psychological support at outpatient appointments. Furthermore, from October 2022 I am enrolled in the Interdepartmental Postgraduate Program "Neurosciences and Neurodegenerative Diseases" of the School of Medicine of the Aristotle University of Thessaloniki. Finally, I work in a private psychologist's office where I conduct individual and group psychotherapy sessions with children and teenagers and administer psychometric tools (ACHENBACH, WISC V, LOGOMETRO).
