

Gogou Christina

My name is Christina Gogou and I am a graduate of the Department of Psychology, School of Social Sciences, University of Ioannina (2021). During the academic year 2021-2022, I studied at the "Neurosciences and Neurodegenerative Diseases" Department of Medicine of the Aristotle University of Thessaloniki. I had the opportunity to work with the Alzheimer Hellas Society twice for the completion of my internship, both at the undergraduate and postgraduate level, where I attended and was trained in the conduct of neuropsychological assessments and non-pharmacological psychotherapy programs, the administration and evaluation of neuropsychological tests for the diagnosis of mild and major mental disorders in old age, as well as in the implementation of non-pharmacological interventions in people with dementia and HND. I also participated in support programs for carers of people with dementia. My interest mainly revolves around the study of behavioral and mood disorders that develop in people with dementia, neuropsychological assessment and psychotherapeutic programs. Finally, I had also participated as a speaker at the 12th Panhellenic Congress on Alzheimer's Disease on the topic "Program for the Development of Mental Functions through education on the topic: History and Monuments of Thessaloniki".
