

## **Ioannidou Stavroula**

I was born and raised in Thessaloniki. I graduated in 2023 with a grade of excellent (9.11/10) from the Department of Biomedical Sciences of the International Hellenic University in Thessaloniki. During my academic years, I attended more than thirty (30) conferences and seminars around the scientific field of Health and Research, which contributed to broaden my knowledge in the medical and research field. These experiences inspired me to continue my studies in the MSc "Research Methodology in Medicine and Health Sciences", specializing in Basic Medical Research, at the Department of Medicine of the Aristotle University of Thessaloniki. My research interests started in 2022, focusing on identifying associations between potential novel biomarkers with oxidative stress markers, also investigating oxidative and antioxidant status, with the aim of preventing and diagnosing various diseases. I look forward to contributing to impactful research projects and developing my expertise in biomedical sciences, especially in the field of basic medical research methods of research.
